

ROUTINE CONTACT LENSES
FITTING/EVALUATION AGREEMENT

A contact lens fitting/evaluation is defined as measurement of the size and shape of the cornea, prescription to increase visual acuity and an evaluation of the contact lens on the eye.

A contact lens fitting/evaluation is necessary to prescribe contact lenses. The contact lens fitting/evaluation also includes an insertion and removal instructional appointment (if necessary), an eyeglass prescription (if applicable) and three months of follow-up care (as recommended by the doctor). The three month follow-up care visits are for appointments related to contact lens fitting/evaluation issues only. If a visit is due to another condition, there will be a separate charge.

A contact lens fitting/evaluation charge is in addition to an eye exam, the contact lens supply and any other charges or services performed by the doctor. All contact lens fitting/evaluation fees are for time spent with the doctor and are non-refundable.

Routine contact lens fittings/evaluation (non-refundable): Routine contact lens fitting/evaluation are for patients who require contact lenses for myopia, hyperopia, presbyopia and astigmatism. They are not considered medically necessary. A routine contact lens prescription is valid for 1 year.

Evaluation of previous fit contact lenses with no change to brand or prescription: \$100.00

New patients must bring prior contact lens prescription to their exam

New fit or refit of soft spherical lenses: \$175.00

New fit or refit of soft toric (astigmatism) lenses: \$175.00

New fit or refit of soft multifocal/monovision contact lenses: \$225.00

New fit or refit of standard rigid gas permeable lenses: \$275.00

Routine contact lenses: The contact lens fitting/evaluation fees do not include the cost of the contact lenses. Our clinical team can discuss these fees with you in more detail.
